

Ancient Egyptians Paper Model:

Snake Headband Instructions

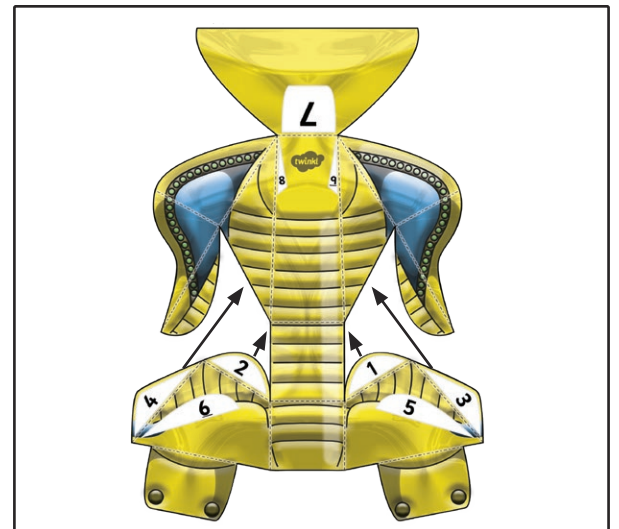

1. Carefully cut out the parts of the model along the solid black outline. Don't forget to cut the five slits on the headband with shape 11 on it and the two slits on the headband with shape 12.

2. Fold along dotted lines.

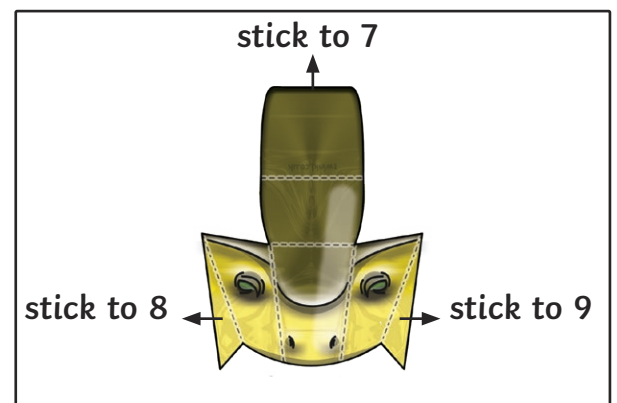

3. Fold your template and glue tabs 1 and 2 behind the snake's neck. Then glue tabs 3 and 4 behind the next section. The arrows show where the tabs should be glued.

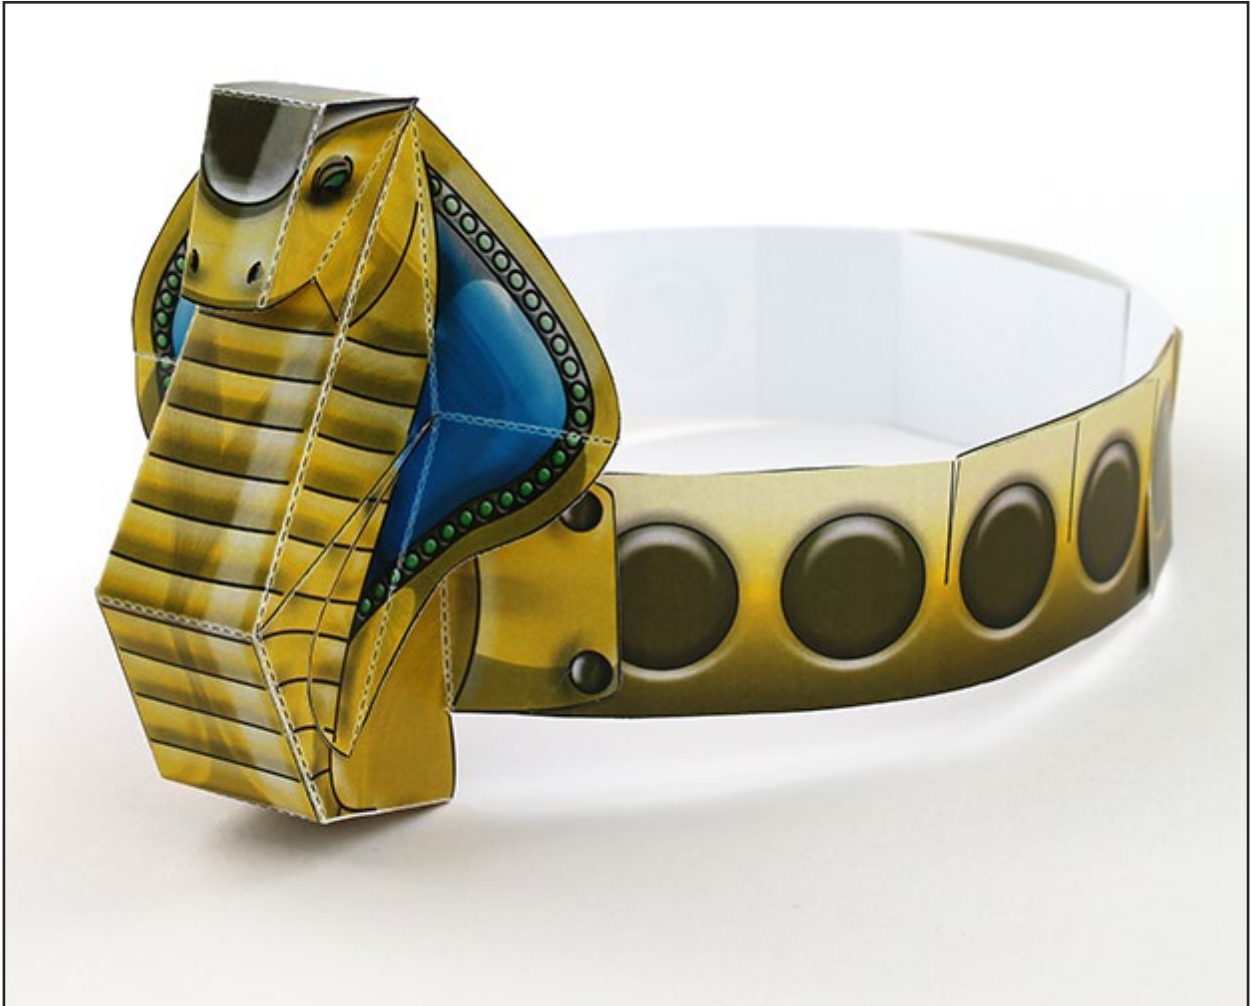

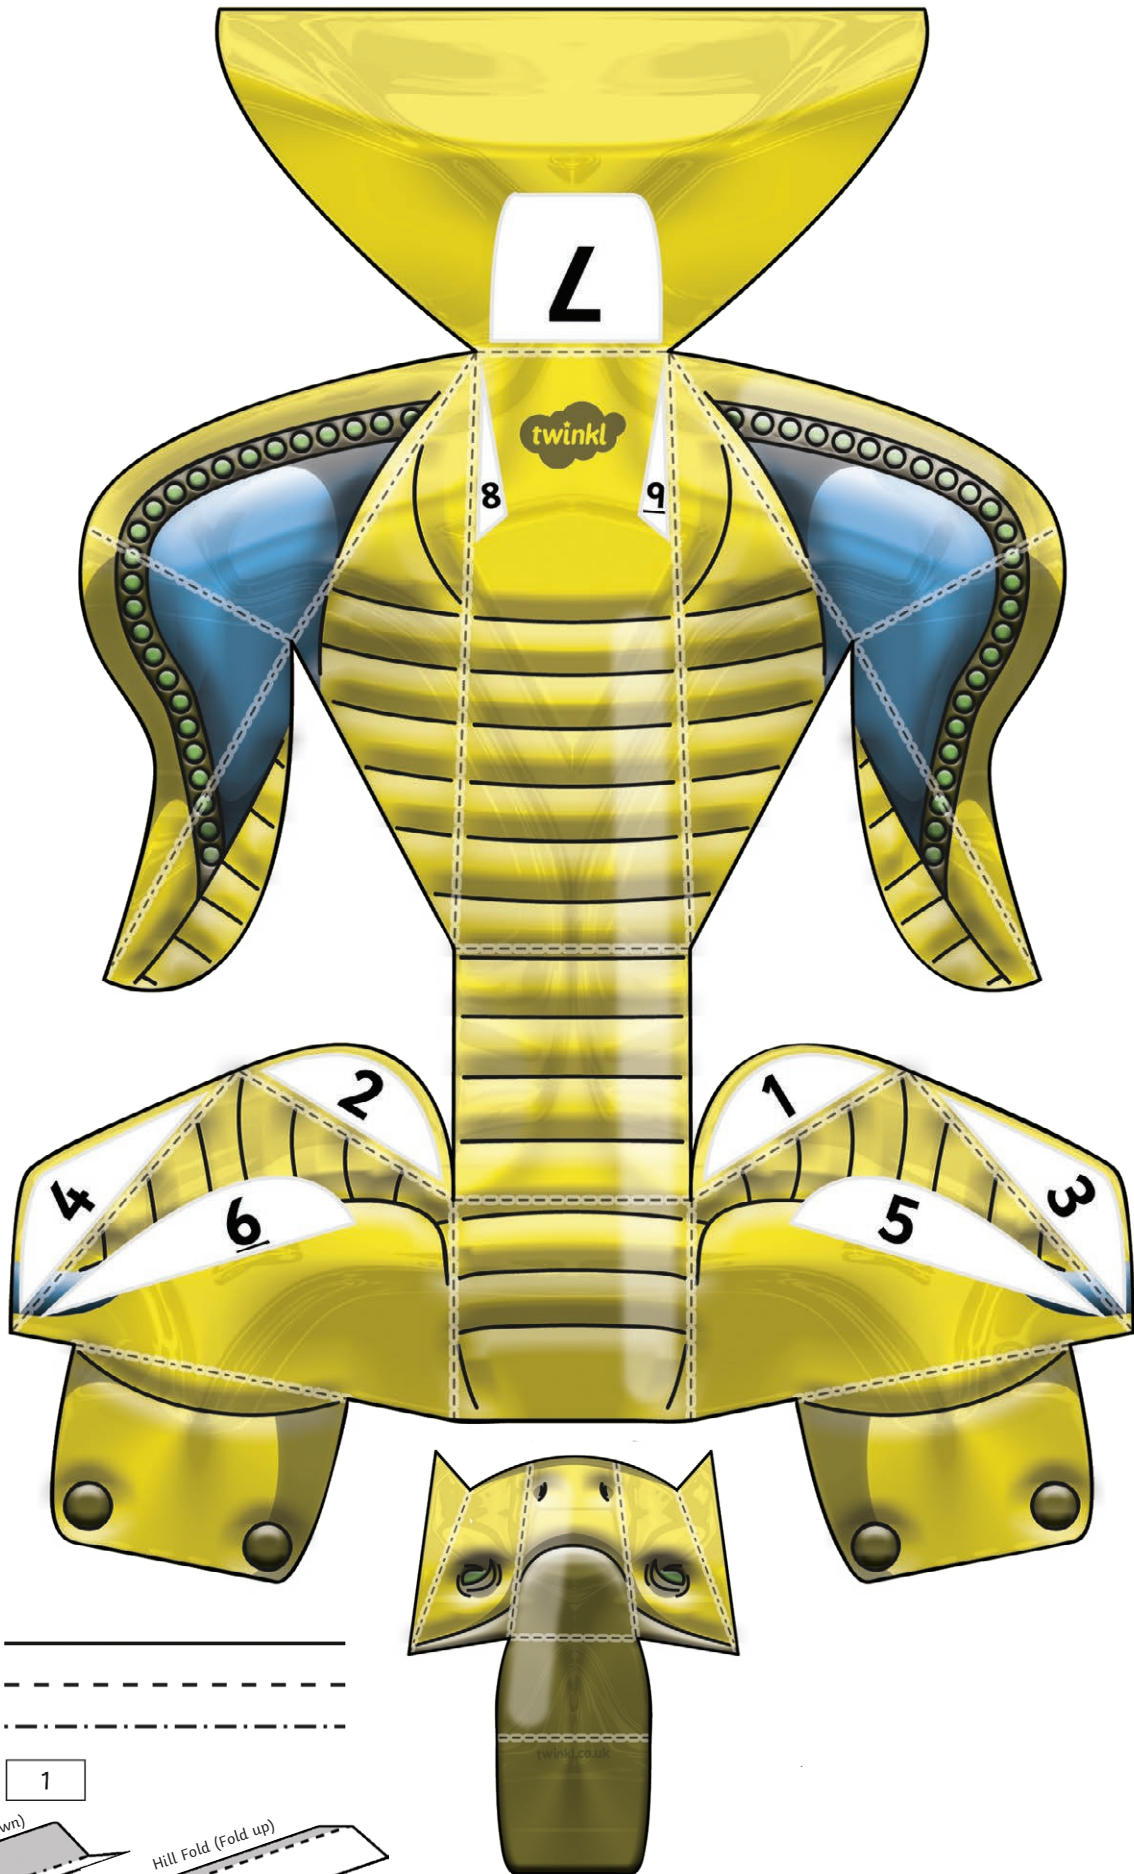

4. Glue the snake's neck hood to tabs 5 and 6.

5. Take the smaller template and attach it to the snake's neck: glue the large flap to shape 7 and then the two smaller tabs to shapes 8 and 9.

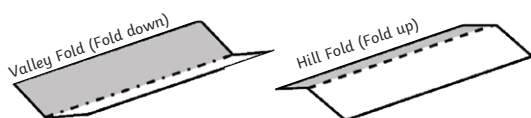

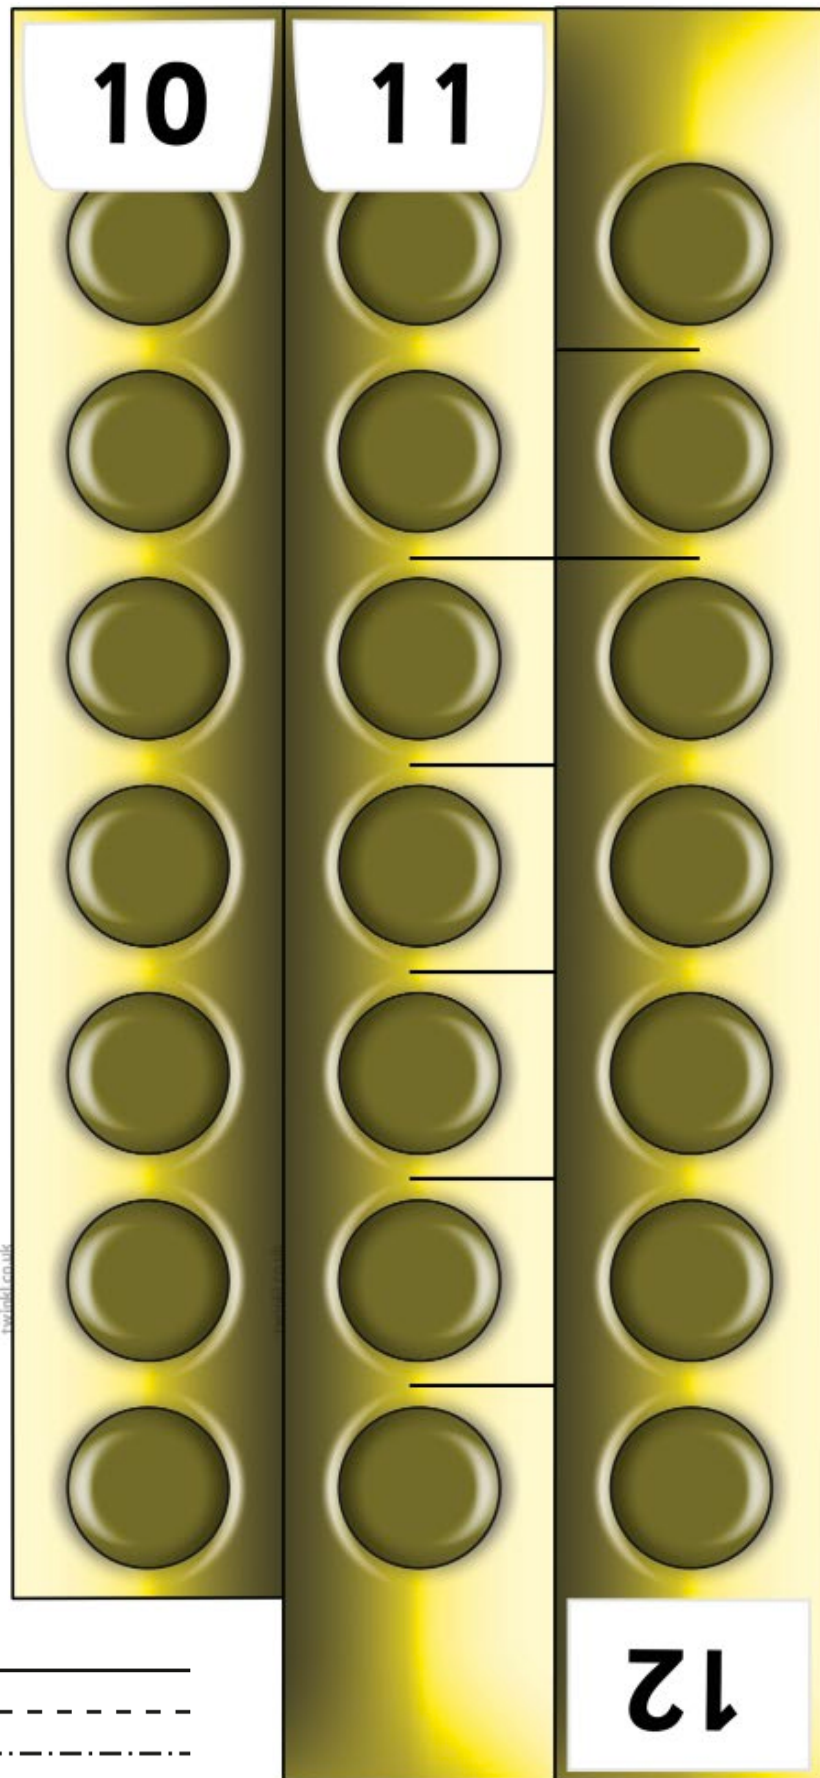

6. Next, join two of the headband pieces to the snake's body: glue shape 10 behind one side of the neck and shape 11 behind the other.
-
7. Add the headband expander template on by gluing shape 12 behind one side. You can adjust the headband for the wearer by joining the two sides with a slit.
